

6 REASONS

Your Supply Chain Planning Belongs in the Cloud

01

ACCELERATE INNOVATION

The cloud provides access to the latest and most advanced analytical technologies such as AI and machine learning, graph data models to create digital supply chain twins, and so much more.

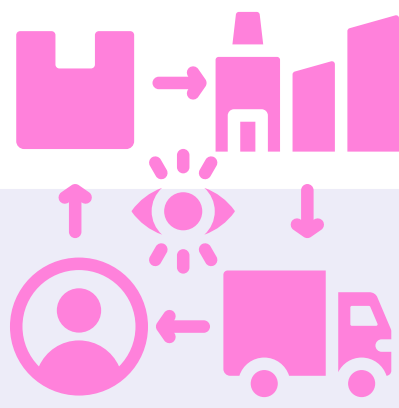

02

FOSTER COLLABORATION

Quickly integrate and connect data with a digital thread across the value chain, empowering real-time collaboration and stronger relationships inside and outside the enterprise.

03

PANORAMIC VISIBILITY

Real-time, updated data fosters true end-to-end panoramic visibility, allowing for more control, and delivering insights to make faster and more informed decisions.

REDUCE IT HEADACHES

Offloading the responsibility of backups, monitoring batches, and maintaining infrastructure allows you to minimize your IT footprint while enhancing agility and flexibility. You can scale up or down as needed without overcommitting resources.

04

05

DATA PROTECTION

Your data is your data, encrypted end-to-end across your multi-enterprise landscape. The latest technologies and methodologies are employed to protect you at every moment.

PERFORMANCE & SCALABILITY

Rapidly scale to meet the needs of your business without worry. In today's hyper-accelerated environment, the speed of the cloud keeps you ahead of the game.

06

“Cloud computing will not only be a technological approach for delivering applications, but will also serve as the key driver of business innovation.” - Gartner

“Cloud is an important driver behind digital transformation. Cloud technology offers organizations ease of use, flexibility, scalability, and a rich set of services for their digital transformation.” - IDC

86%

of supply chain-based companies are expected to adopt cloud computing within the next five years.

MHI Annual Industry Report

60%

of cloud leaders outperform their competitors in supply chain transformation.

Accenture

88%

of leaders view cloud as a cornerstone of their digital strategy and believe it is vital to driving revenue.
